High Heat Resistance

The high heat resistance materials are developed for this unique model to achieve more than 1,000 times continuum emitting with full flash power without overheating problems.

Using the latest quartz tube design

Capture the important moments, and reliably in the case of high power and high frequency flash shooting, without concerns about overheating flash effects.

Equipped with flash diffuser

For full frame digital SLR camera, you can greatly expand the flash illumination angle and also weaken the shadow of the edge from direct flash lighting, suitable for portrait photography.

Combination

High-performance MG8000 with Nissin Power Pack PS 8/ PS300 can speed up the recycle time to achieve high power and frequency of flash photography.

More Features

- **Metal Hotshoe**
Durable metal hotshoe design, easy to install and reduce the chance of damage caused by installation.
- **Sub-Flash**
The MG8000 provides a sub flash below the main flash. This small flash gives a fill-in light while bouncing the main flash. Bouncing the light may shadow the underside of face, and this fill-in flash brightens up the shadow.
- **My TTL**
TTL exposure level is accurately calibrated for standard balance in accordance with Nissin's standard. If any adjustment is however required, or if you like to set your own preferable level, it can be adjust for about +/- 3EV by every 1/3 EV step.
- **External Service Box**
 - ① External Power Pack Socket – MG8000 supports Nissin Power Pack PS 8/ PS300.
 - ② PC Sync Terminal – MG8000 has PC sync terminal socket for flash synchronization.
 - ③ USB Service Port – MG8000 provides a USB port to upgrade to the latest firmware.

*Additional accessories are available for purchase - Battery Magazine BM-01, Nissin Power Pack PS 8.

POWER PACK PS 8

EXTERNAL POWER BOOSTER

- For Canon Flash System
- For Nikon Flash System
- For Sony Flash System

Compact • Lightweight

The core boosting circuit of Nissin Power Pack PS 8 has been redesigned to reduce the heat, compare with previous model, it now uses a high-strength plastic instead of a metal housing for the body. Because of this, the size is now more compact while maintaining the high-performance at the same time.

Quick-loading battery cartridge

The Nissin Power Pack PS 8 has a new battery cartridge design. In addition to greatly increasing the battery capacity, the new battery design helps to decrease the overall weight.

Battery level indication LED

When the battery level is less than or equal to 30%, it turns from "green" to "red" and the LED beings "blinking red", this indicates that the battery is nearly discharged.

USB socket

USB power output which supports DC 5V 2A output. It can be a fast charging device for Image data transfer or others like smartphones and tablet devices in case of any emergency.

High Speed charging

The Power Pack PS 8 provides high speed charging, approximately 0.7 seconds to recharge MG8000 and it can be shooted 550 flashes per every full power output (GN 60).^{#1}

^{#1} Tested with Nissin Power Pack PS 8 full charged battery and MG8000 full charged 4 x LR6 rechargeable batteries.

Output sockets

Provides 2 power sockets. Users are able to work with 2 flashes at the same time. A variety of power supply cables are provided for different camera brands.

- External Power Pack Socket in Nissin MG8000/ Di866 Mark II/ Di866/ Di700/ Di700A flash and MF18 macro flash.

[Specifications of Ni-MH battery pack]

Auto Rotation & Color Display

The color display will automatically rotate from horizontal to vertical as the flash is rotated and the user friendly six icon interface represents each of the modes of operation— Auto, TTL, Manual/Av, Multi, Wireless TTL (Master/Remote) and Customer Setting.

Digital TTL

TTL: Support Canon E-TTL, E-TTL II and Nikon i-TTL. Flash light is automatically controlled by the camera but the flash exposure value can be compensated.

Manual: Flash power can be adjusted manually at 22 levels, from full power to 1/128 power at every 1/3 stops. The appropriate distance to the subject is shown in the display in accordance with the aperture value set on the camera.

Av priority: The flash light can be automatically controlled by the photo sensor built-in the flash unit instead of TTL metering. The F. Stop can be set from F1.4~F16. The distance at the F-stop set on the flash and camera is shown in the display.

Multi Flash: Repeating flash for multi-exposure image in one frame. The power ratio can be set from 1/8 to 1/128.

TTL Mode

Manual Mode

Av priority Mode

Multi-flash Mode

Wireless TTL

The Di866 Mark II Wireless TTL system supports Canon E-TTL/ E-TTL II and Nikon i-TTL. Di866 Mark II can be used in combination with Canon or Nikon original flash units as either Master or Remote (Slave).

The Di866 Mark II also supports digital (pre-flash system) and analogue (film type camera's flash and/or studio flash under both of Manual and Av. priority mode.

More Features

- **Metal Hotshoe**
Durable metal hotshoe design, easy to install and reduce the chance of damage caused by installation
- **Sub-Flash**
The Di866 Mark II provides a sub flash below the main flash. This small flash gives a fill-in light while bouncing the main flash. Bouncing the light may shadow the underside of face, and this fill-in flash brightens up the shadow.
- **My TTL**
TTL exposure level is accurately calibrated for standard balance in accordance with Nissin's standard. If any adjustment is however required, or if you like to set your own preferable level, it can be adjust for about +/- 3EV by every 1/3 EV step.
- **External Service Box**

- ① External Power Pack Socket – The Di866 Mark II supports Nissin Power Pack PS 8/ PS300.
- ② PC Sync Terminal – The Di866 Mark II has PC sync terminal socket for flash synchronization.
- ③ USB Service Port – The Di866 Mark II provides a USB port to upgrade to the latest firmware.

*Additional accessories are available for purchase - Battery Magazine BM-01, Nissin Power Pack PS 8.

NAS is Nissin newly developed 2.4GHz radio transmission wireless flash system. To compare with the traditional optical wireless transmitters, 2.4GHz radio transmission is less susceptible to angle and obstacle limitation, coverage up to 30 meters. Transmission channels and radio transmission IDs can be set to prevent misfiring in the event of signal interference on the same channel. Nissin Commander Air 1 can control 3 groups of Nissin Flash Di700A with the user friendly operation panel and variety function, it would be more convenient for the user.

Flexible combination of Nissin NAS. Nissin Commander Nissin Air 1 can be mixed to control different versions of Nissin Di700A for wireless TTL or manual flash.

After binding setting on Nissin Di700A and Nissin Air 1. You can control the flash TTL EV compensation/ Manual output/ Manual zoom on Air 1 and all set to be displayed on Nissin Di700A at the same time. Nissin Air 1 has the AF assist light for shooting in dark environments.

Select dial

The Di700A features the use of a select dial to quickly move through all settings.

Professional flash head design

It has rotating lock release buttons. Flash head rotates horizontally 180° to right and left, tilts up to 90° and expanded 7° of downward tilt, which is suitable for close up photography. It makes bounce shooting more arbitrary, with more angles that can be used.

Focal length range coverage of 24-200mm

The auto zoom coverage has increased to 24~200mm from its predecessor. It can achieve maximum output of GN54 at 200mm.

Wireless TTL Slave

In this mode, Di700A synchronizes to the wireless remote flash system. For remote all channel groups A/B/C in digital flash.

 Set the commander Air 1 (master unit) and flash (slave unit) with the binding setting and channel setting procedure to perform wireless shooting.

More Features

- **Supports high-speed synchronization**
Support up to 1/8,000 seconds shutter speed.^{#2}
^{#2} The shutter speed depending on the camera.
- **Wireless TTL mode**
Supports Canon E-TTL/ E-TTL II, Nikon i-TTL.
Various slave settings offer flexible wireless flash combination.
- **External Service Box**
 - ① External Power Pack Socket - The Di700A supports Nissin Power Pack PS 8/ PS300.
 - ② The Di700A has Standard & 3.5mm PC sync terminal sockets are built-in for flash synchronization.
- **Battery Magazine - BM - 02**
The new design of battery magazine perfectly matches with the stylish look of the Nissin Di700A.

*Additional accessories are available for purchase - Battery Magazine BM-02, Nissin Power Pack PS 8.

Height comparison Nissin i40 and Nissin standard flash

Focal length range coverage of 24-105mm •

Powerful output • Soft box

The pocket size of Nissin i40 weights only 203g of weight.^{#5} The flash output of GN40 at 105mm. The zoom range auto adjusts from 24mm-105mm (12mm-53mm for 4/3, 16-70mm for Fujifilm X-mount). The flash comes equipped with a built-in diffuser that gives a 16mm lens coverage. A Soft box is included for soften light output and reduce the shadows.

Selector dial • Simply operation panel

Two selector dials controls : Function dial and Power dial. The Indicator lamp will show the position of adjustment.

LED video light

Video light function, which has 9 steps of output level adjustment.

Only 203g of weight

Impact flash

Professional flash head design

The flash head rotates horizontally 180° to right and left and tilts up 90° which is suitable for close up photography. This makes bounce shooting more arbitrary, with more angles that can be used.

Four size-AA batteries

4 AA batteries to operate the i40, it can reduce the frequency of changing the batteries and reduce the recycling time.

Metal hotshoe • Quick release button

Durable metal hotshot design (except Sony version) with quick release button, easy to install and reduce the chance of damage caused by installation.

More Features

- (1) Supports high-speed synchronization (except Fujifilm version)
Supports up to 1/8,000 seconds shutter speed.^{#6}
- (2) Wireless TTL mode (except Fujifilm version)
Various slave settings offer flexible wireless flash combination.

Accessories included:

Soft case

Soft box

Carabiner
(not for climbing)

Flash stand
(with screw)

* Focal length coverage 24-105mm which is according to 35mm CCD format. For different type camera, please check your camera instruction manual. *

* The pictures above are for reference only. The real object should be considered as the different flash version. *

^{#4} Except Fujifilm version

^{#5} Without batteries and soft box.

^{#6} The shutter speed depending on the camera.

Modeling LED

LED focus lamp with light ratio control, makes it easy to focus on the shooting subject. The brightness reflects flash power ratio setting of left and right, the effect can be previewed.

Modeling LED switch on

More Features

- **Metal Hotshoe**
Durable metal hotshoe design, easy to install and reduce the chance of damage caused by installation
- **External Service Box**
 - ① External Power Pack Socket – The Ring flash MF18 supports Nissin Power Pack PS 8/ PS300.
 - ② PC Sync Terminal – The Ring flash MF18 has PC Sync Terminal socket for flash synchronization.
 - ③ USB Service Port – The Ring flash MF18 provides a USB port to upgrade to the latest firmware.

*Additional accessories are available for purchase - Battery Magazine BM-01, Nissin Power Pack PS 8.

Accessories

Universal Shoe Cord SC-01

Off camera TTL Cord having multi-shoe contacts. This single cord will work with Canon and Nikon hotshoe cameras when used with an appropriate dedicated flash.

Length of cord: 30cm/12 inch when folded / 150cm/59 inch when expanded

Battery Magazine BM-01

A battery magazine is separately available for MG8000, Di866 Mark II, Di866, Di466 and MF18. Keep one extra with your flash for an easy and quick reloading.

Battery Magazine BM-02

A battery magazine is separately available for Di700 and Di700A. Keep one extra with your flash for an easy and quick reloading.

Power Supply Cable (Canon/ Nikon/ Sony)

A power supply cable (Canon/ Nikon/ Sony) is separately available for Nissin Power Pack PS 8/ PS300. Keep one extra with your Power Pack for two flashes at the same time.

Power Pack Battery - PS 8

A power pack battery is separately available for Nissin Power Pack PS 8. Keep one extra with your Power Pack for an easy and quick reloading.
